

Possible Mosquito Sources

Possible Source:	What to Do:
Decorative Pond	Stock with mosquito fish (ask Mosquito District) or use <i>Bacillus thuringiensis israelensis</i> (Bti) larvicides (i.e. Mosquito Dunks). Inquire at your local hardware store or nursery. Thin out aquatic vegetation.
Swimming Pool/Spa	Operate filter and skimmer every day to remove egg rafts and larva. Provide drainage for filter and pump sumps. Remember chlorine will NOT kill mosquito larva. Stock disused or "out-of-order pools with mosquito fish (ask Mosquito District).
Pool/spa covers	Keep tight. Remove water from top of cover weekly.
Wading pool	Change water weekly. Store indoors when not in use
Bird bath	Change water weekly
Tree Hole	Check frequently for water. Consult tree specialist to see if hole may be safely filled with sand or mortar. Place Bti larvicides in hole.
Rain Gutters	Clean frequently to remove leaf litter and keep water flowing.
Containers (i.e. jars, unused flower pots, buckets, wheelbarrows, etc.)	Dispose of, turn upside down or store indoors.
Septic Tank	Seal and cover openings so adult mosquitoes cannot enter. Contact County Environmental Health Department for advice.
Under house or basement	Check for water, especially after rain. Drain if necessary.
Livestock watering trough	Stock large troughs with mosquito fish. Clean small ones weekly.
Catch basins/storm drains/street gutter	Check for standing water. Contact Mosquito Control.
Boats	Keep tightly covered. Remove drain plug. Check and drain cover weekly if necessary.
In-ground utility boxes	Check for standing water. Pump out if necessary.
Tires	Remove or drill holes so water will drain.
Rain barrels	Screen top with fine wire mesh. Change water weekly. treat with Bti.
Water gardens	Stock with mosquito fish or use Bti larvicides.
Leaky pipes & faucets	Repair.
